NEW FEATURES

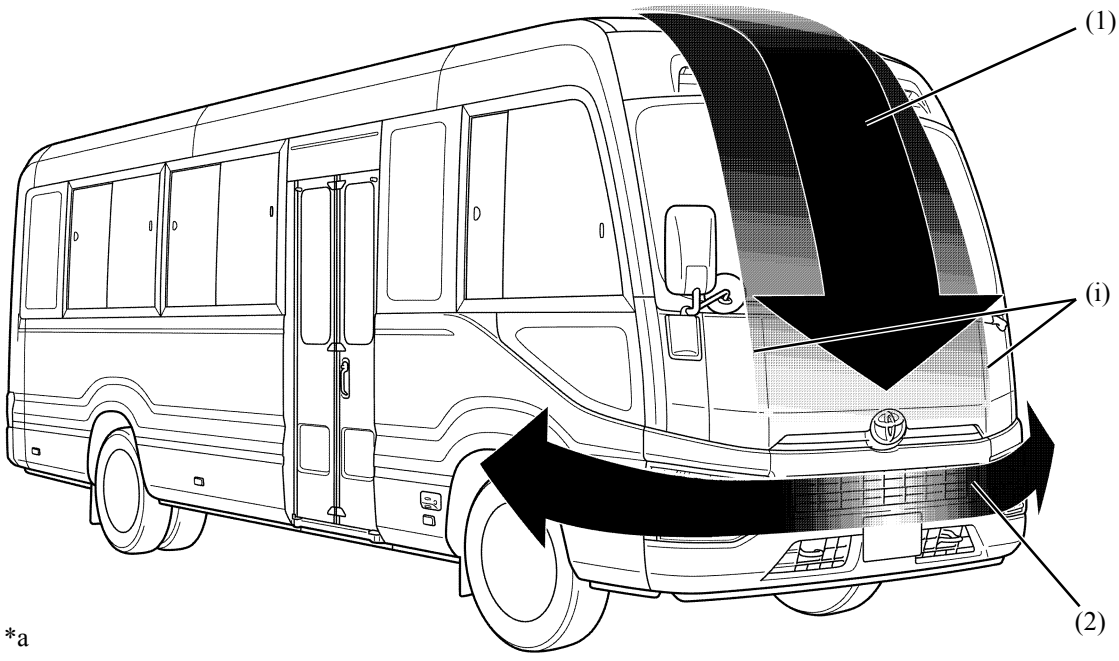

EXTERIOR

■ GENERAL

- With the design keywords of “Modern and Tough”, the silhouette of the refined package is utilized to combine a simple and modern flavor timeless enough for a long model life and tough styling that can handle various environments.
- Reevaluating the overall height and width and expanding the cabin resulted in a square body silhouette that projects the spaciousness of the interior.

■ FRONT AND SIDE DESIGN

- By establishing flat breaks (i) on the front panel, the vertically arching upper body that meets the pillar silhouette of the side view provides a bright and spacious interior space. (1)
- The horizontally arching lower body supports the upper body and provides a sense of security. (2)

- The black out hood tape* of front panel and the S-shaped graphic that connects the bottom edges of the side glasses emphasize the grouped upper body. (3)
- Unifying the headlight assembly with the carriage that continues from the sides provides a functional simplicity. (4)
- The floating-island shape of the graphic of the headlight assembly brings out the front bumper cover from the exterior to provide a deeper layout and a sense of protection. (4)
- A front bumper cover integrated front bumper spoiler has been adopted to improve the design. Furthermore, either the same color as the panels or black (molded-in color) is used for the front bumper spoiler and provided depending on the specifications.

- The use of chamfering on the side of the roof gives the cabin a simple and modern look. (5)
- An under section with a powerful carriage configuration that emphasizes the wheel wells has been adopted to firmly support the large cabin. (6)
- 2-tone tape with excellent repair characteristics has been adopted and provided depending on the specifications.
- An aero stabilizing fin has been adopted on the side turn signal light assembly* to improve aerodynamic performance.
