■TACHOGRAPH

1. General

- The tachograph was adopted a electrically analog type recorder, which records the vehicle speed and trip distance for seven days.
- All vehicles (without for Australia) are able to select the tachograph as maker option.
- The tachograph is set up in the center cluster, this is stylish design and easy to use.

2. Function

Component	Function
Opening/Shutting cover	Door for cartridge assembly
Cartridge eject/cover opening button	Eject the cartridge assembly and open or shut the cover.

- Cartridge assembly
  Cartridge assembly into the tachograph is combined gear of the cartridge with clock of the tachograph. A chart sheet on the cartridge is rotated one revolution per 26 hours.
