■FRONT SUSPENSION

- A rigid axle suspension with leaf springs was equipped on all models.

1. Front leaf spring

- Superior riding comfort was secured by optimizing the leaf spring to suit its applications.

2. Front shock absorber

- A cylindrical reciprocating-type shock absorber was adopted, with specifications optimized to suit all vehicle service conditions.

3. Front stabilizer

- To secure superior handling characteristics and safety, 32 mm-diameter front stabilizers are provided as optional equipment on wide cab models.
