■LUBRICATION SYSTEM

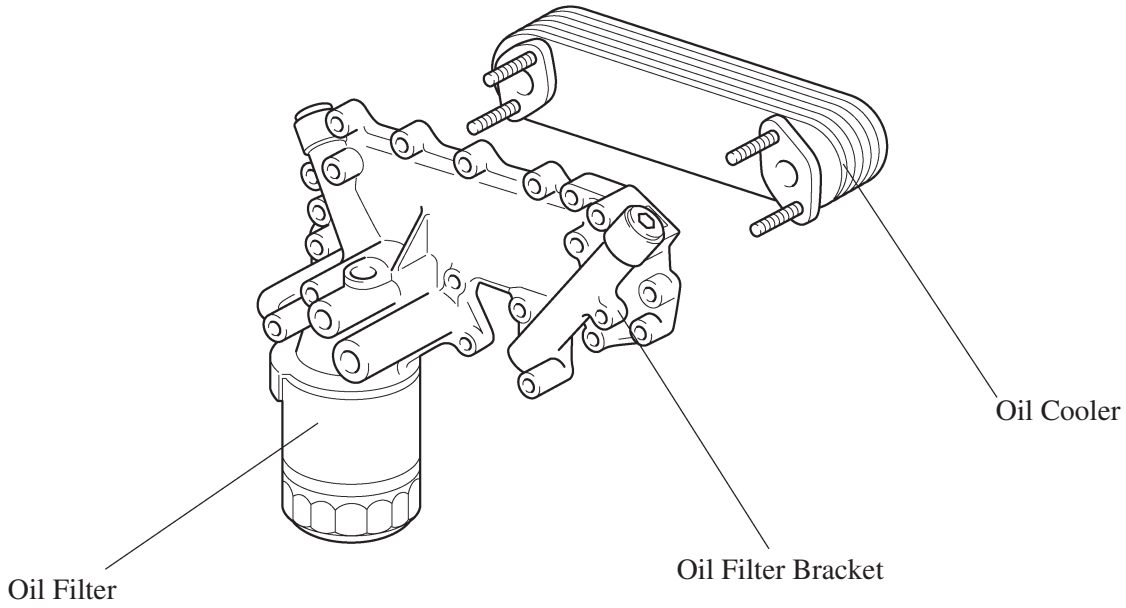

1. General

- A full-flow, full-filter lubrication system is used.
- A highly efficient oil cooler is provided upstream of the oil filter.
- Oil jets for cooling and lubricating the pistons are used.

2. Oil Cooler and Oil Filter

- A water-cooled, multiplate, 6-element type oil cooler, which is built into the cylinder block, is used.
- A twin-element type oil filter that contains two systems, a full-flow type and a bypass type, is used.
