REAR VIEW MIRRORS

■ OUTSIDE REAR VIEW MIRRORS

The outside rear view mirrors have the following functions and equipment:

Function	Outline	Equipment		
		Middle East	General Countries	China
Electrical Remote Control	When the outer mirror switch assembly is operated, this function moves the mirror surface vertically or laterally to enable the driver to attain an optimal mirror angle. Setting the outer mirror switch assembly to the "R" position operates the right mirror, and setting it to the "L" position operates the left mirror.	Option	Standard	Standard
Mirror Light	When the headlight dimmer switch assembly is turned to the TAIL or HEAD position, the mirror lights which are built into the outside rear view mirrors turn on.	Option	Standard	Not Equipped
