TRANSFER

■ DESCRIPTION

The FJ cruiser uses 2 types (VF2A, VF4B) of transfers.

- The VF2A (Part-time) transfer is installed on the A750F automatic transmission.
- The VF4B (Full-time) transfer is installed on the RA61F manual transmission. Its main feature is the adoption of the TORSEN* LSD (Limited Slip Differential) in the center differential.

*: TORSEN is a JTEKT CORPORATION's registered trademark.

The specifications of each type of transfer are as follows:

Transfer Type	VF2A (Part-time)	VF4B (Full-time)
Transmission Type	A750F (AT)	RA61F (MT)
A.D.D.* System (See page CH-53)	Equipped	-
Center Diff. Lock	-	Equipped
Rear Diff. Lock (See page CH-57)	Optional	Optional

*: Automatic Disconnecting Differential
