■SEAT

1. General

- Active headrests have been provided for the front seats as standard on all models.
- The shape of the seat back and the headrest on the front seats has been optimized to help reduce shocks to the occupants.

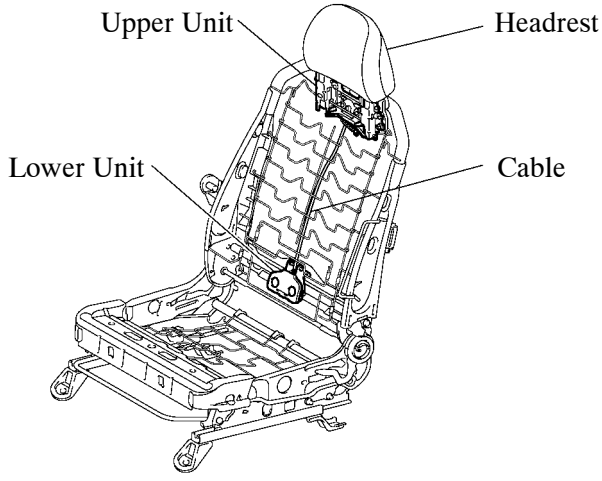

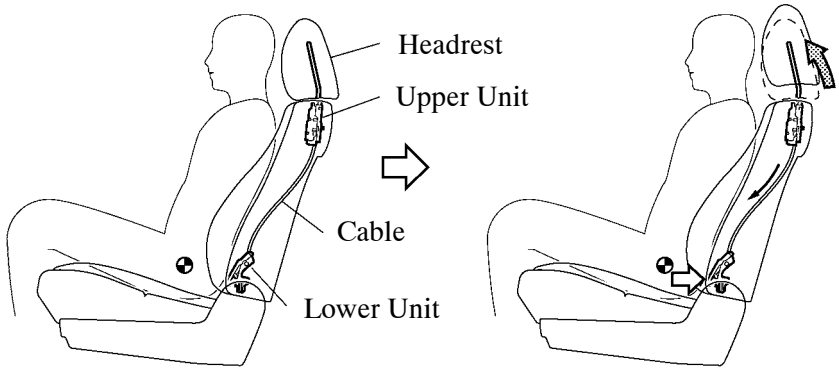

Front Seat **A – A Cross Section**

10YBO03TE

2. Active Headrest

- Active headrests are provided, which move up and forward almost instantly in the event of a rear-end collision when the force of the occupant body is applied to the seat back and reduce the distance between the occupant's head and the headrest.
- The active headrest consists of the lower unit, cable and upper unit.
- When the lower unit built into the seat back is pressed by the occupant's lumbar as the occupant's body slides down during a rear-end collision, the cable is pulled and the headrest is moved up and forward by the upper unit, reducing the distance between the occupant's head and the headrest.
