■ BLUETOOTH AUDIO SYSTEM

1. General

The Bluetooth audio system enables users to enjoy music played on portable players or cellular telephones (with built-in audio player) from the vehicle speakers via wireless communication.

NOTE:
- The cellular phone or portable player must correspond to the following specifications in order to be connected to the Bluetooth audio system. However, note that some functions may be limited depending on the type of portable player.
- The following profiles must be supported:
  - Advanced Audio Distribution Profile (A2DP) Version 1.0
  - Audio/Video Remote Control Profile (AVRCP) Version 1.0 or higher (version 1.3 or higher recommended)

2. Function

- The functions of the Bluetooth audio system that can be used vary with the version of the Audio/Video Remote Control Profile (AVRCP) supported by the Bluetooth audio player that is being used.

×: Usable, —: Unusable

Function	Outline	Audio/Video Remote Control Profile	
		Version 1.0 or Higher, Version 1.3 or Lower	Version 1.3 or Higher
Play	Starts playing the music.	×	×

- Other functions are as follows:

Function		Outline
Set Bluetooth Audio Play	Registering Bluetooth Audio Player	In order to use the Bluetooth audio system , it is necessary to register a Bluetooth audio player in the audio head unit. Once a Bluetooth audio player is registered, the Bluetooth audio system becomes available automatically. The user can register up to 2 Bluetooth audio players.
	Deleting Bluetooth Audio Player	The user can delete a Bluetooth audio player.
	Connecting Bluetooth Audio Player	The user can select whether to connect to the Bluetooth audio player automatically or manually. If the Bluetooth audio player has been registered and automatic connection is enabled, the Bluetooth audio player will be connected automatically.
Change Settings of Bluetooth Audio	Selecting Bluetooth Audio Player	If the user has registered a second Bluetooth audio player, either one can be selected for connection.
	Displaying Bluetooth Audio Player	The user can view the information of the Bluetooth audio player on the system.
	Changing Connection Method	The user can select the connection method. With this function, the user determines whether to make a connection from the audio head unit to the Bluetooth audio player or from the Bluetooth audio player to the audio head unit.
	Displaying Bluetooth Audio Setting	The user can see the Bluetooth audio information settings on the system.
	Changing Device Name or Passcode	The user can change a device name or a passcode.
	Initializing Bluetooth Audio Settings	The user can initialize the settings.
