■ILLUMINATED ENTRY SYSTEM

- The illuminated entry system is used on the GL grade models for the G.C.C. countries, the Russia & Ukraine models, the 4-door high roof wide body commuter 16, glass models of the GL grade* for general countries.
- Unlike the previous illuminated entry system that is controlled by the ECU, this system switches the key illumination on and off in accordance with the courtesy switch ON/OFF signal by opening and closing of the door without a timer function.

*: Other than on the GL grade models with the 4-door standard roof commuter
