Instrument Panel

- The instrument panel consists of a horizontal motif theme that emphasizes simplicity and wideness, and a well-modulated color rhythm that achieves a fresh look.
- On the GL grade, the center cluster is provided with silver ornaments to achieve an elegant look.
- Shut-fin type registers are used. Their surface becomes flush when they are closed, thus achieving a simple and streamlined design.
- The shift lever is placed in the instrument panel to facilitate the movement of the occupants from the driver side to the passenger side.
- An undercover is provided in the lower area of the instrument panel to achieve a good appearance.
