Seat

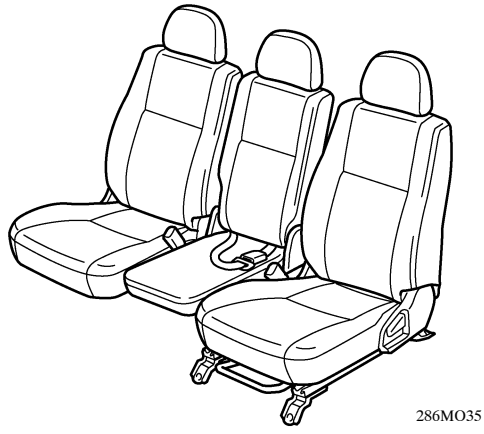

Fabric seat covers are provided on all models as standard equipment. Vinyl leather seat covers are available as optional equipment on some models for General Countries.

Front Seat

- Four types of front seats are available.
- A flat mat structure that consists of springs and straight cables is used in the seat back frame to realize an excellent ride feel.
- The driver's seat slides 225 mm (8.9 in.), while the front passenger and center seats remain stationary.
- A center console that consists of a retractable table and a cup holder is provided on the center seat back of the front seat in which the front passenger seat and the center seat are integrated.
