# HIACE

## OUTLINE OF NEW FEATURES

The following changes are made for the new HIACE.

### 1. 2TR-FE Engine

In order to meet emission regulations, the engine control and TWCs (Three-Way Catalytic converters) characteristics have been optimized on the 2TR-FE engine models for Mexico.

### 2. Combination Meter

A speed warning system has been provided as standard on panel van models for Tunisia. When the vehicle speed exceeds 110 km/h (68 mph), the system warns the driver by sounding the buzzer.
