INTERIOR

■INSTRUMENT PANEL

- Instrument panel design has been changed.
- By applying silver to the center instrument cluster finish panel sub-assembly, A/T shift bezel, steering pad switch LH, and No. 1 steering wheel ornament, a feel of freshness has been expressed to give fulfillment to the driver.
- The color of the instrument panel upper has been changed from a light color to a dark color. Along with this change, the grain of surface has been changed from geometry type to leather type to improve texture and to express a high-class appearance.
