■ DAYTIME RUNNING LIGHT SYSTEM

The daytime running light system is designed to automatically illuminate the daytime running light, during the daytime to keep the vehicle highly visible to other vehicles.

▶ System Diagram ◀

▶ Function of Main Components ◀

Component	Function
Combination Meter Assembly	Receives various signals and illuminates the daytime running light.
Headlight Dimmer Switch Assembly	Outputs a light control position signal and transmits it to the combination meter assembly.
ECM	Outputs an engine speed signal and transmits it to the combination meter assembly.

▶ Operating Condition ◀

The daytime running lights illuminate when the following conditions are met:

– IG ON.
– Light control switch off.
– Engine is running.
– Parking brake is off.
