# AIR CONDITIONER

## ■ DESCRIPTION

### 1. Heater Control Panel

The design of the heater control panel has been changed. A dial (No. 2 heater control knob) which is integrated with internal/external air selector and blower controller has been adopted to improve operability and appearance.

**New** 04Z8BE03D

**Previous** 04Z1HA12Y

### 2. Resister

The shape and layout of the fins of the air outlet grille attached to the roof of the vehicles equipped with rear cooler have been changed. They become flush when closed, thus the appearance has been improved.

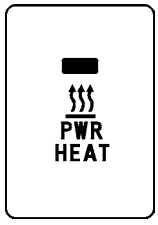

**New** 04Z8BE02D

**Previous** 04Z8BE01D

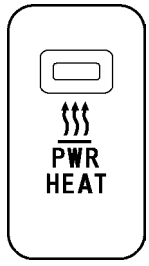

### 3. Heater Switch Assembly (Models with Hot-gas Power Heater System)

The design and shape of the heater switch assembly for the hot-gas power heater system have been changed.
