SLIDE DOOR

■ POWER SLIDE DOOR SYSTEM

1. General

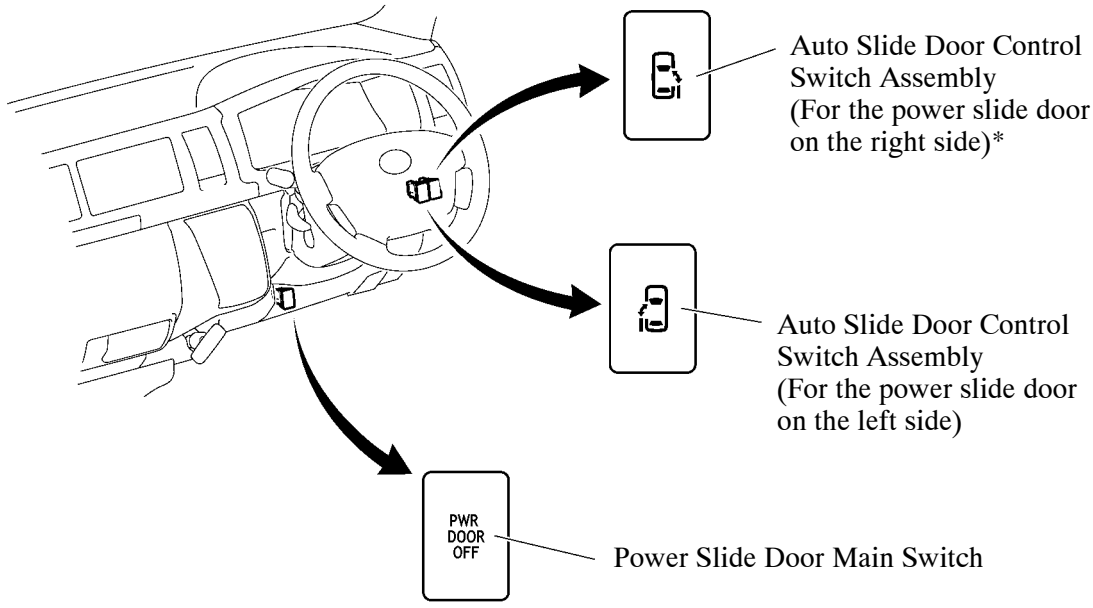

- In addition to the vehicles equipped with the power slide door on the left side which has been provided previously, both the vehicles equipped with the power slide door on the right side and the vehicles equipped with the power slide doors on both left and right sides have newly been provided depending on the destinations.
- The system for the power slide doors on both left and right sides is controlled by the door control relay assembly attached on each slide door on both left and right sides so that they can be operated independently.
- The control of the power slide door system has not been changed.
