AUDIO SYSTEM

■ DESCRIPTION

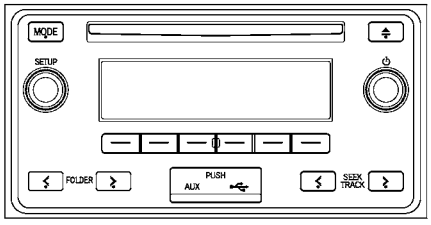

1. Head Unit

- The audio specifications for the destinations shown in the table below have been changed.
- A 3-line VFD (Vacuum Fluorescent Display) has been adopted to the audio display to improve operability such as track selection.

▶ Head Unit Specifications ◀

Design	Destinations	Specifications	Major changes
 04Z8BE110	South Africa	● AM (9 kHz)/ FM (0.05 MHz) Tuner ● CD Player ● RDS Function ● MP3 Playback Function ● USB Jack and AUX ● Manufacturer: Fujitsu TEN	● USB jack and AUX added

2. Antenna

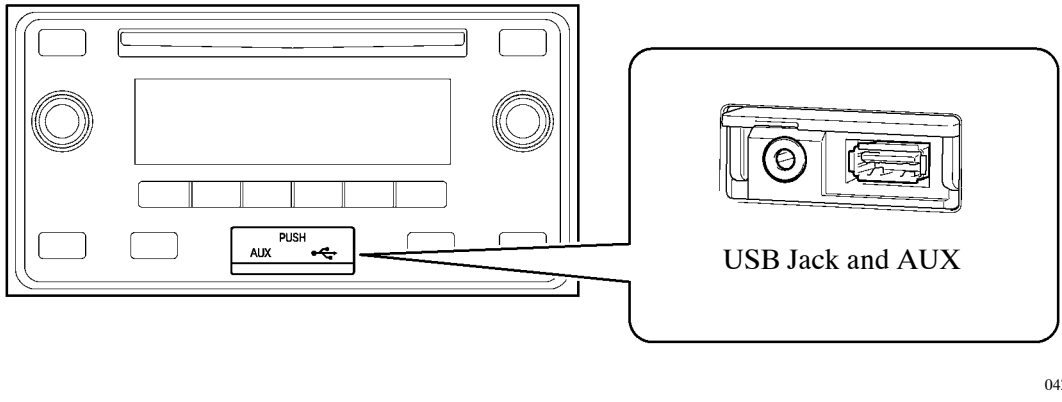

A glass antenna (rear side window assembly RH) has been adopted on the quarter window on the right side of the vehicle of some models. This improves the appearance and eliminates the necessity to fold the antenna when parking in a low ceiling space.

3. USB Jack and AUX

A USB jack and an external input terminal (AUX) have been provided at the bottom center of the audio panel, making it possible to operate external equipment.

4. Steering Pad Switch LH

Frequently used switches are located on the steering pad for easy use.
