1GD-FTV EMISSION CONTROL

■ GENERAL

1. Outline

1) Exhaust Emission Control System

- An oxidation catalyst is used to reduce emissions in the exhaust gas.
- An Exhaust Gas Recirculation (EGR) system is used to reduce emissions in the exhaust gas.
- A Diesel Particulate Filter (DPF) is used to effectively collect and purify CO, HC and Particulate Matter (PM) contained in exhaust gas.
- A UREA SCR system is used to reduce NOx.
