MULTI DISPLAY

■ DESCRIPTION

- The multi display is an option for the center cluster panel. The display is a diagonal 7.0 inch LCD (Liquid Crystal Display) screen with a pressure sensitive touch panel.
- Through the use of the GPS (Global Positioning System) and map data in a DVD (Digital Versatile Disc), this navigation system analyzes the position of the vehicle and indicates that position on the map that is displayed on the screen. Additionally, it provides voice instructions to guide the driver through the route to reach the destination.
- Upon receiving the operation information from the A/C ECU that is transmitted by the gateway ECU, trip information from the meter ECU that is transmitted by the gateway ECU, the navigation information that is transmitted by the navigation ECU, and the operation information from audio unit, multi display displays theses data on the display.
- The operation and control of the air conditioner system can be effected through the use of the automatic air conditioner display of the multi display and the touch switch that appears on the display.
