WIRELESS DOOR LOCK REMOTE CONTROL SYSTEM

■ DESCRIPTION

The wireless door lock remote control system has been adopted as optional equipment. This system is a convenient system for locking and unlocking all the doors at a distance. This system in the new Kluger has the following features:

- In this system, the wireless door lock receiver performs the code identification process and the body ECU effects the door lock control. Serial data link is provided for communication between the wireless door control receiver and the body ECU.
- A rolling code system, in which the signal configuration changes each time when a signal is transmitted by the transmitter, is used.
