■SYSTEM DIAGRAM

- There is no communication between the CAN or LIN, and AVC-LAN because this multiplex communication system does not use the gateway function (transfer protocol function). The CAN or LIN and AVC-LAN are separate networks.
- For the LIN network communication needs of the following systems, the following 4 LIN buses are used:
  - Air Conditioning Bus
  - Meter Bus
  - Certification Bus
  - Door Bus

For AVC-LAN*

*: The AVC-LAN is used only on the models for Australia.
