POWER DISTRIBUTOR

■ DESCRIPTION

The power distributor uses non-contact type semiconductor relays to reduce the weight of the relay block. The following semiconductor type relays are integrated in the power distributor.

Relay	Type	Relay	Type
EFI MAIN Relay	Semiconductor	S-HORN Relay	Semiconductor
H-LP RH Relay	Semiconductor/IPS (Intelligent Power Switch)	HORN Relay	Semiconductor
H-LP LH Relay	Semiconductor/IPS	C/O Relay	Semiconductor
A/F Relay	Semiconductor	H-LP RH, LH Relay	IPS
