ELECTRICAL BACK DOOR OUTSIDE HANDLE SYSTEM

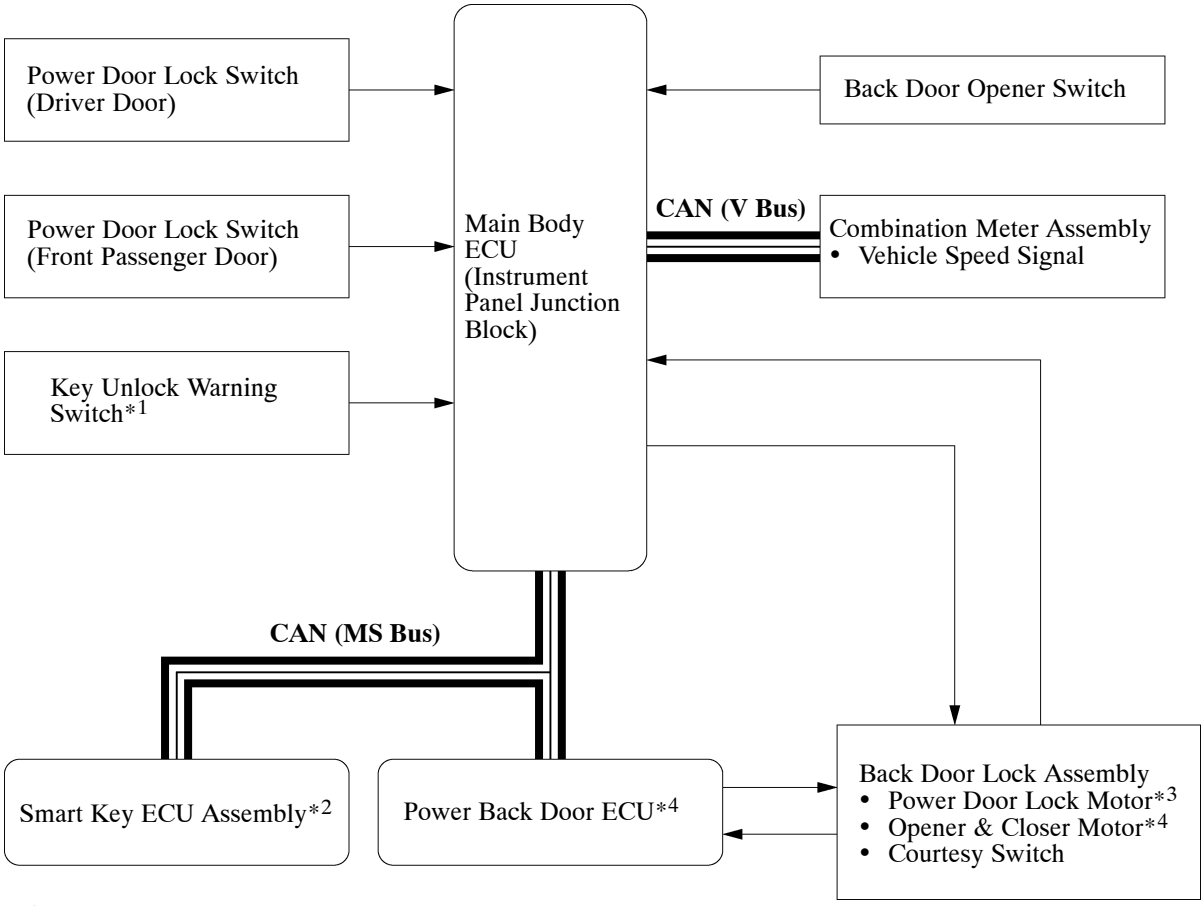

■ DESCRIPTION

The electrical back door outside handle system enables the back door to be electrically opened using the back door opener switch.

- When this system does not operate due to a discharged battery or malfunction the back door can be opened by directly operating the open lever in the back door lock assembly.
- This system activates when the following two conditions are met:
  - Vehicle speed is less than 5 km/h.
  - An unlock signal is input into the Main Body ECU*1 (Instrument Panel Junction Block) or Smart Key ECU Assembly*2.
