Navigation with AV System

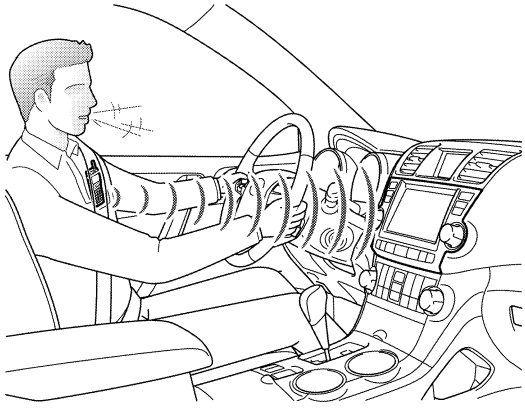

The navigation with AV system has the features of 3 systems (audio system, navigation system, and Bluetooth hands-free system).

- The audio system has an AM/FM tuner, in-dash 4-CD changer, 9-speaker, and an AUX jack. Furthermore, the audio system can play MP3 (MPEG audio layer 3) and WMA (Windows Media Audio) files.
- The Bluetooth hands-free system allows the driver to make or receive a call without taking their hands off the steering wheel when the system is linked with a Bluetooth-compatible cellular phone.
- Through the use of the GPS (Global Positioning System) and map data which is stored on a DVD, the navigation system analyzes the position of the vehicle and indicates that position on the map that is displayed on 8.0-inch wide LCD (Liquid Crystal Display) with a pressure sensitive touch panel.
