ELECTRICAL BACK DOOR OUTSIDE HANDLE SYSTEM

■DESCRIPTION

The electrical back door outside handle system enables the back door to be electrically opened using the back door opener switch.

- When this system does not operate due to a discharged auxiliary battery or a malfunction, the back door can be opened by directly operating the open lever in the back door lock assembly.
- This system activates when the following two conditions are met:
  - Vehicle speed is less than 3 mph (5 km/h).
  - An unlock signal is input into the smart key ECU assembly.
