FRONT WIPER DEICER SYSTEM

■ DESCRIPTION

The front wiper deicer system uses a heater element in the front windshield glass to help reduce the formation of ice where the front wipers park.

- This system is controlled by the Air Conditioning Amplifier.
- This system is activated when the power source is turned IG-ON, and the front wiper deicer switch is pushed. The Air Conditioning Amplifier activates to keep the mirror heater and the front wiper deicer ON for approx. 15 minutes.
- The front wiper deicer system is optional equipment on models for U.S.A. and standard equipment on models for Canada.
