(5)	Quarter	Privacy	Privacy Tempered	90.2 %	78.2 %	23.6 %
(6)	Back Door	Privacy	Privacy Tempered	95.9 %	89.6 %	11.1 %

2. Glass Hatch

A glass hatch is available, enabling luggage to be loaded and unloaded easily without opening the back door.

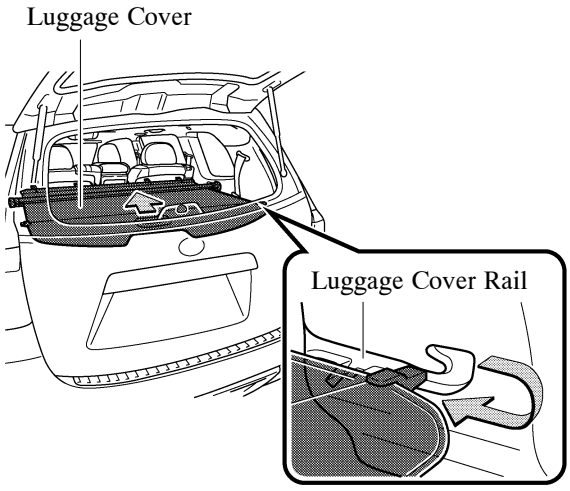

- A detachable rear wiper is adopted for the glass hatch, ensuring rear visibility.
- A hinge stopper is adopted for the glass hatch to prevent it opening too far. This helps prevent contact with nearby objects when the back door is opened while the glass hatch is open.

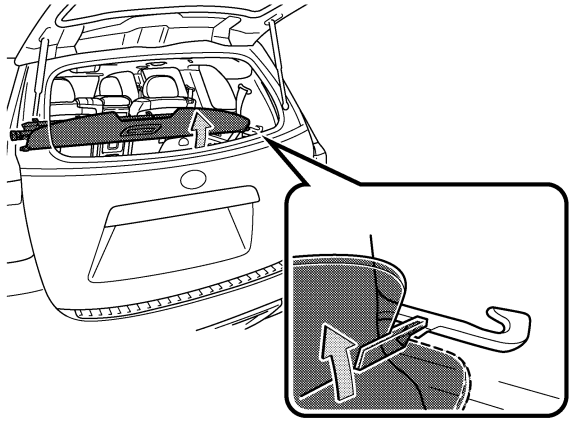

Glass hatch opens **Back door opens***

*: Opening the back door with the glass hatch already open does not latch the glass hatch to the back door.

- Luggage cover rails are provided. The rails are used to keep the luggage cover at a half-open position so that luggage can be loaded or unloaded through the glass hatch while the luggage cover is installed.
