Chassis

Suspension

Front Suspension	MacPherson strut Type Independent Suspension
Rear Suspension	MacPherson strut Type Dual Link Independent Suspension

07V0MO14Z

Steering

Type	EPS (Electric Power Steering)

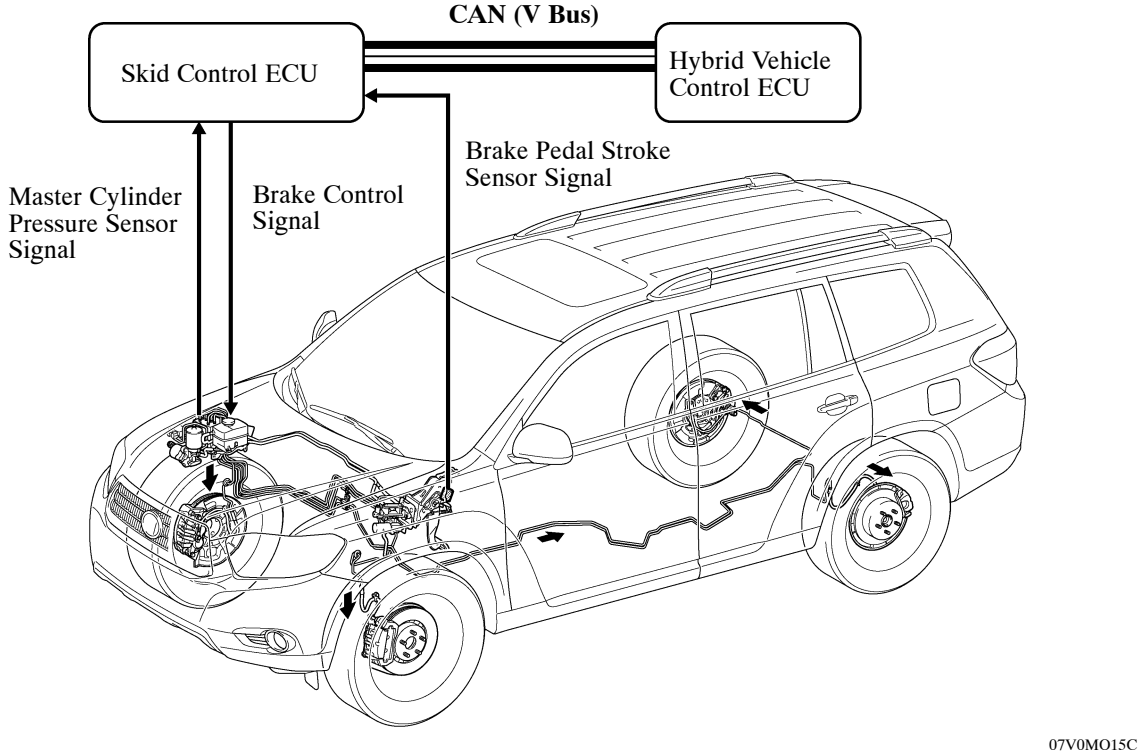

Brake

Front Brake	Type	Ventilated Disc
	Rotor Size (D × T)*	328 × 28 mm (12.9 × 1.1 in.)
Rear Brake	Type	Solid Disc
	Rotor Size (D × T)*	309 × 10 mm (12.2 × 0.4 in.)
Brake Control		● Electronically Controlled Brake System ● Regenerative Brake Cooperative Control ● VDIM (Vehicle Dynamic Integrated Management) and Hill-start Assist Control

*: Diameter × Thickness

Electronically Controlled Brake System and Regenerative Brake Cooperative Control

- The electronically controlled brake system detects the amount of brake pedal operation via the brake pedal stroke sensor and master cylinder pressure sensor. The skid control ECU adjusts the hydraulic pressure supplied to each wheel to generate the best brake effort.
- In addition, unique to hybrid vehicles, regenerative braking cooperative control is performed by the electronically controlled brake system to allow the HV battery to be charged effectively.
