A detailed diagram of a 30-pin connector, likely a ribbon cable connector. The connector is shown from a top-down perspective, highlighting its symmetrical design. It features a central row of 30 pins, numbered 1 through 30 from left to right. The pins are arranged in a 3x10 grid. The top row contains pins 1, 2, 3, followed by a gap, then pins 4, 5, 6. The middle row contains pins 7, 8, 9, followed by a gap, then pins 10, 11, 12, followed by a gap, then pins 13, 14, 15, followed by a gap, then pins 16, 17, 18. The bottom row contains pins 19, 20, 21, followed by a gap, then pins 22, 23, 24, followed by a gap, then pins 25, 26, 27, followed by a gap, then pins 28, 29, 30. The connector has a central locking mechanism and two side latches. The diagram is a black and white line drawing.

90980-12909

A diagram of a calculator keypad. The keypad is rectangular with a slightly rounded top. It features a display screen at the top, which is a small rectangle with a pinkish-red background. Below the screen are several function buttons, including a power button (a small square with a circle inside) and a clear button (a small square with an 'X' inside). The main keypad area consists of two rows of buttons. The first row contains buttons numbered 1 through 12. The second row contains buttons numbered 13 through 24. The buttons are arranged in a grid, with the numbers 1 through 12 in the top row and 13 through 24 in the bottom row. The buttons are white with black numbers. The entire keypad is enclosed in a black border.

90980-12554

A diagram of a 10-pin DIP package. The package is rectangular with rounded corners and a notch on the left side. It has two rows of five pins each. The pins are numbered 1 through 10. The numbering starts at the top-left pin (1), goes right to the top-right pin (4), then down to the bottom-right pin (10), and finally left to the bottom-left pin (5). The pins are shown as small rectangles with a central dot.

90980-12359

90980-12358

The diagram shows a top-down view of a calculator keyboard. It features a numeric keypad on the right with digits 0-9 and a decimal point. A row of function keys (1-12) is located above the numeric keypad. The left side of the keyboard contains a row of function keys (1-3) and a second row of function keys (13-19). The bottom row consists of keys 20 through 26, including a power-on/off key and a clear key. The calculator has a display screen at the top and a power switch at the bottom.

90980-12444

Diagram illustrating a 40-column layout, likely representing a punched card or data structure. The layout is divided into two rows of 20 columns each, numbered 1 through 40. The top row contains columns 1-20, and the bottom row contains columns 21-40. Above the columns, there are several rectangular blocks representing punch holes or data fields. A central block is highlighted with a red outline.

90980-12557

A detailed illustration of a calculator keypad. It features a numeric grid with two rows of six buttons each, numbered 1 through 12. Above the grid is a display screen area with a small rectangular indicator. Below the grid are several function buttons, including a power button and a square root button.
