

Power Seat (RHD Driver's Seat w/ Seat Position Memory)

Power Seat (RHD Driver's Seat w/ Seat Position Memory)

The diagram illustrates the electrical circuit for the Front Door Courtesy Light Switch Assembly RH. It shows the following components and their interconnections:

- F18(A), F19(B) Main Body ECU**: Contains terminals 13 (CANL), 14 (CANH), 27 (FRCY), 10 (CANN), and 9 (CANP).
- F112 No. 6 CAN Junction Connector**: A central connector with terminals 13, 2, 15, 4, 14, 3, 15, 6, 22, 10, 8, and 9.
- H2(A) Outer Mirror Control ECU Assembly RH**: Contains terminals 7 (GND), 8 (CANN), 9 (CANP), and 15 (HF2).
- Front Door Courtesy Light Switch Assembly RH**: Includes a switch labeled L1 connected to terminal 16 (FL2).
- No. 11 Junction Connector**: Located at the bottom, it connects the main harness to the ground (LB) through a fuse (L25).

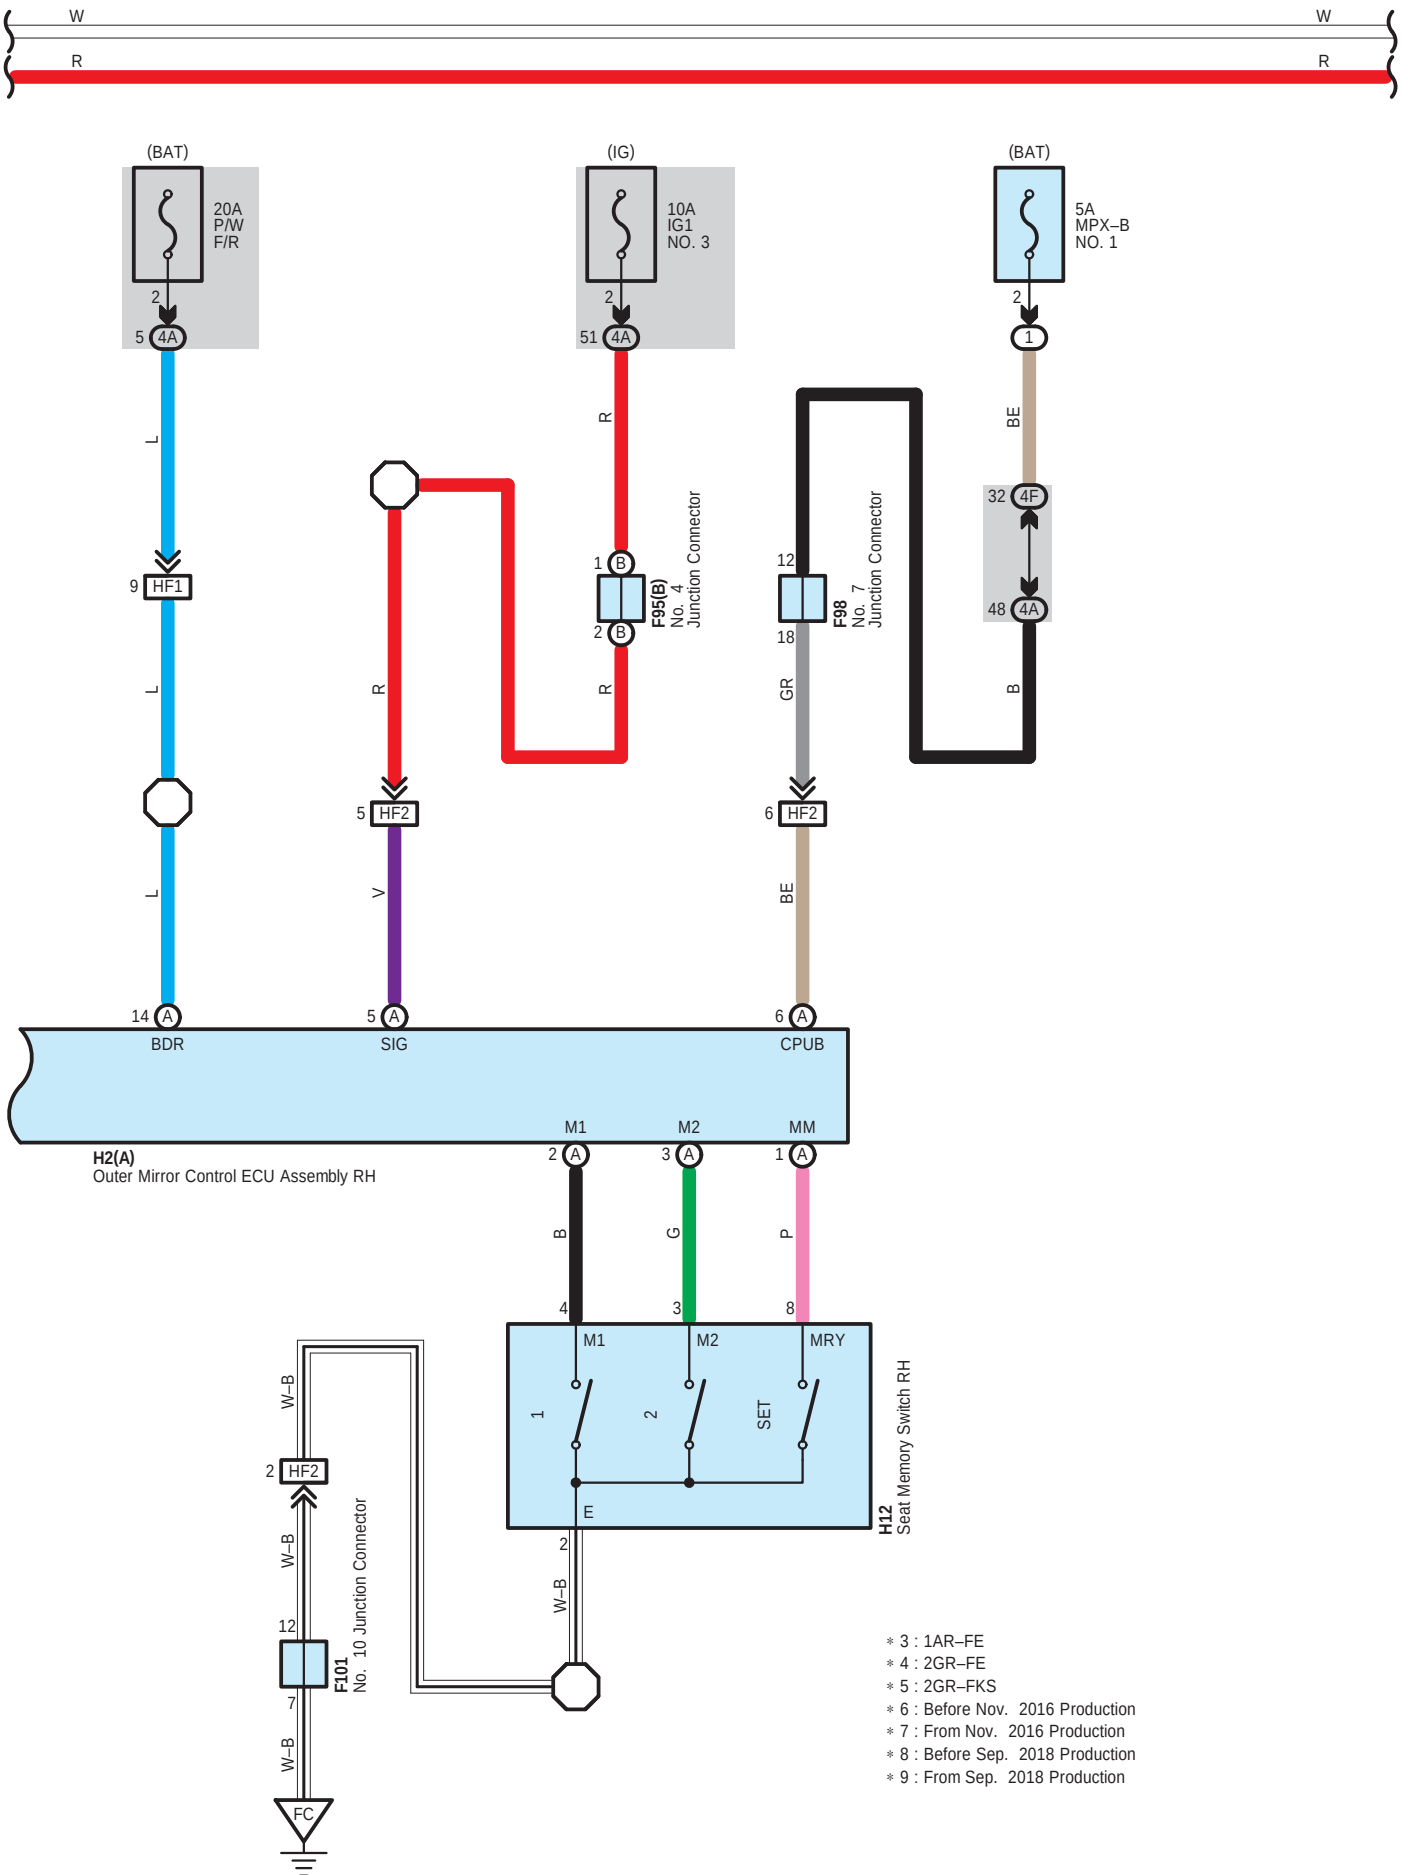

Wire Color Coding and Connections:

- Blue Wires (L)**: Connect from the Main Body ECU (terminals 27, 10, 9) through the junction connectors to the light switch assembly (terminal 16) and the outer mirror control ECU (terminal 15).
- Green Wire (G)**: Connects from the Main Body ECU (terminal 13) to the junction connector (terminal 2) and then to the outer mirror control ECU (terminal 8).
- Pink Wire (P)**: Connects from the Main Body ECU (terminal 14) to the junction connector (terminal 4) and then to the outer mirror control ECU (terminal 9).
- Red Wire (R)**: Connects from the Main Body ECU (terminal 27) to the junction connector (terminal 3) and then to the outer mirror control ECU (terminal 15).
- White Wires (W)**: Represent ground connections throughout the system.

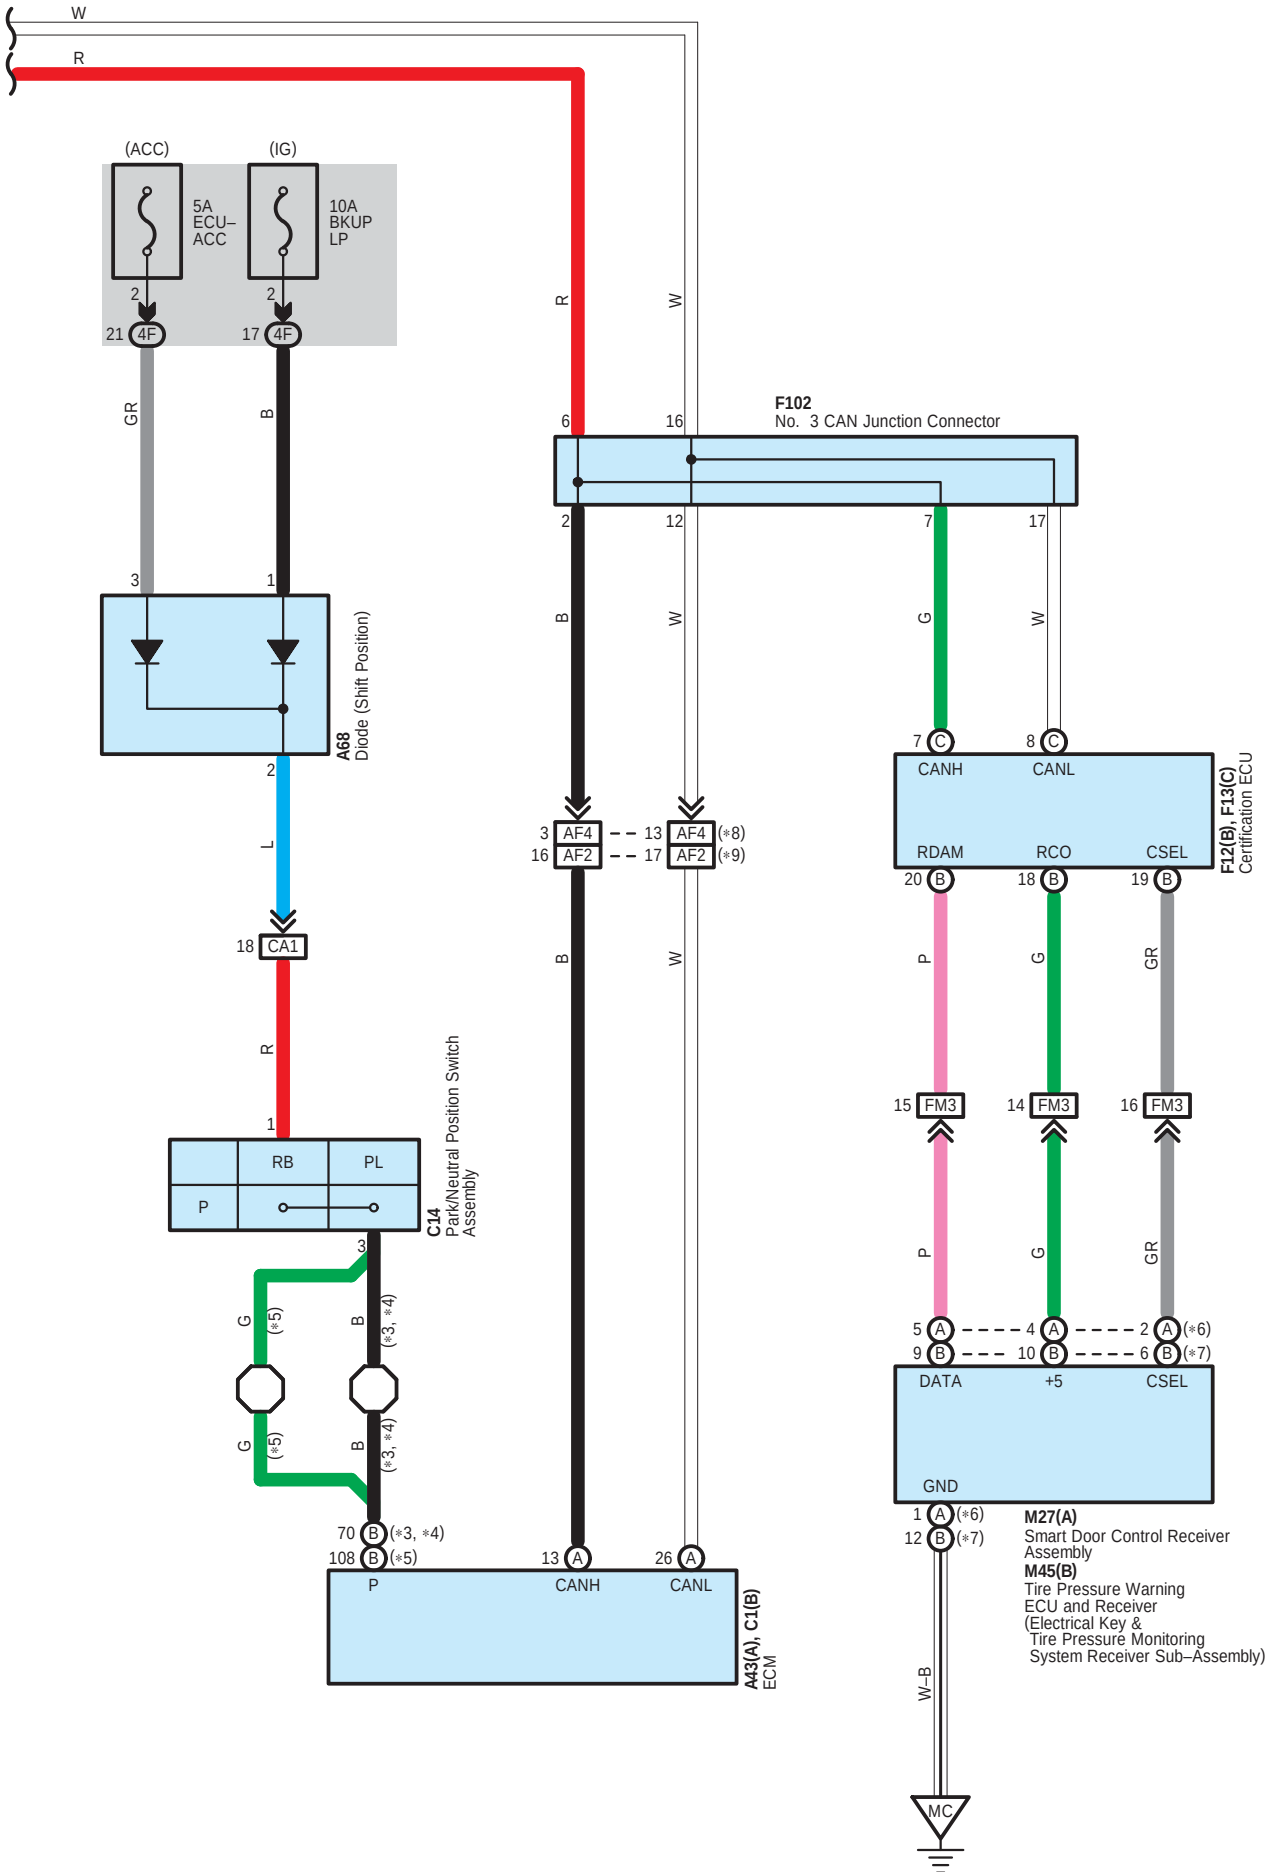

Legend:

- * 8 : Before Sep. 2018 Production
- * 9 : From Sep. 2018 Production
