EXTERIOR

Front View

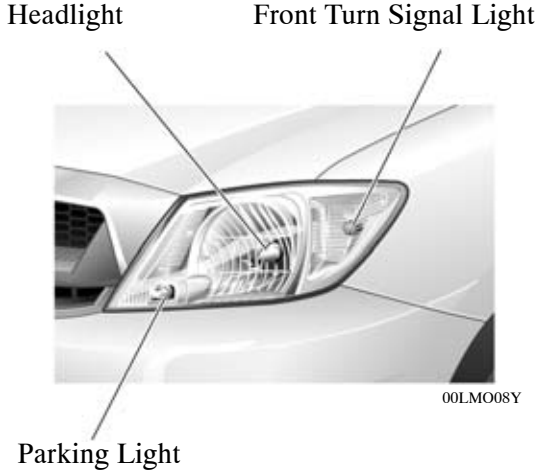

- A three-dimensional structure is provided on the right and left sides of the front bumper for the front design to express a tough impression. In addition, a laterally widespread lower grille has been used to achieve a low center-of-gravity and a wide appearance.
- Clear-colored inner lenses are used in the side turn signal lights of the headlights.
- An SUV-like large grill is used for the radiator grille. Three types of radiator grilles are provided; material type, color and plated type, and plated type.
- Round front fog lights are provided on the right and left sides of the front bumper.
- An engine hood bulge is provided on models with the intercooler.
