MULTI-INFORMATION DISPLAY

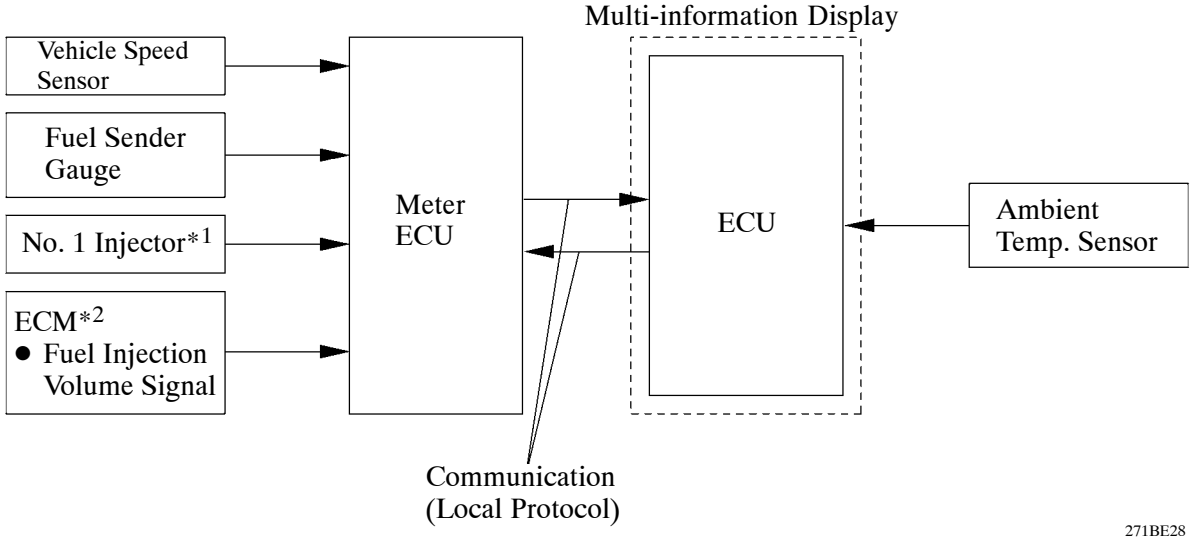

■ DESCRIPTION

- The new Hilux uses a multi-information display.
- The display functions of this system can be switched by pressing a switch on the display panel.
- The following information appears on the multi-information display: clock, ambient temperature, average fuel consumption, instant fuel consumption, average vehicle speed, elapsed time, drivable distance, and compass. The ECU, which is built into the display, causes these pieces of information to appear on the display in accordance with the information signals provided by the meter ECU and sensors.
