WIRELESS DOOR LOCK CONTROL SYSTEM

■ DESCRIPTION

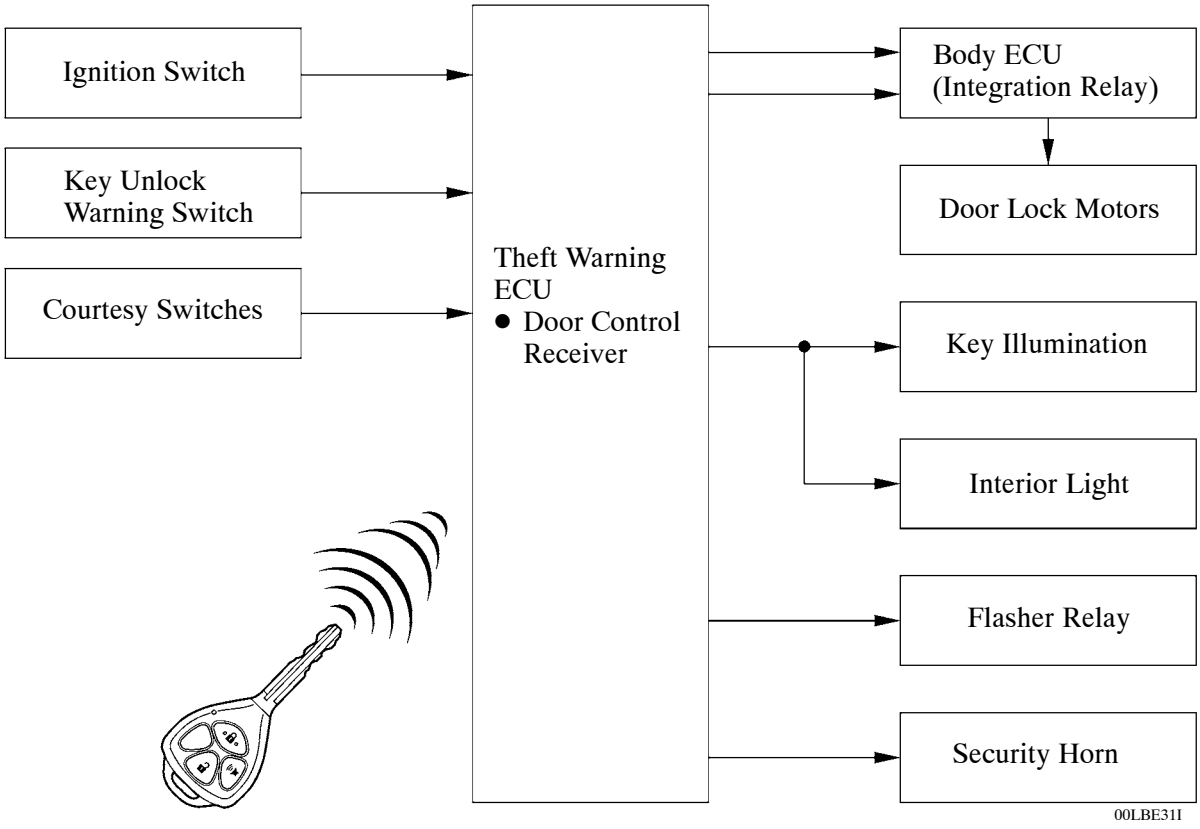

- The new Hilux uses a wireless door lock control system.
- This system is convenient for locking and unlocking all the doors at a distance.
- A key-integrated, 2-button type or 3-button type* transmitter is used.
- The functions of the wireless door lock control system on the Hilux differ between the models with and without the theft deterrent system.
- On the model with the theft deterrent system, the door control receiver is integrated in the theft warning ECU.
- The door control receiver performs the code identification process and the Body ECU effects the door lock control.
- On the models without the theft deterrent system, a serial data link is provided for establishing communication between the door control receiver and the Body ECU.
