SUSPENSION AND AXLE

■ SUSPENSION

1. General

Double-wishbone type independent suspension for the front and leaf spring type rigid axle suspension for the rear are used on the new Hilux.

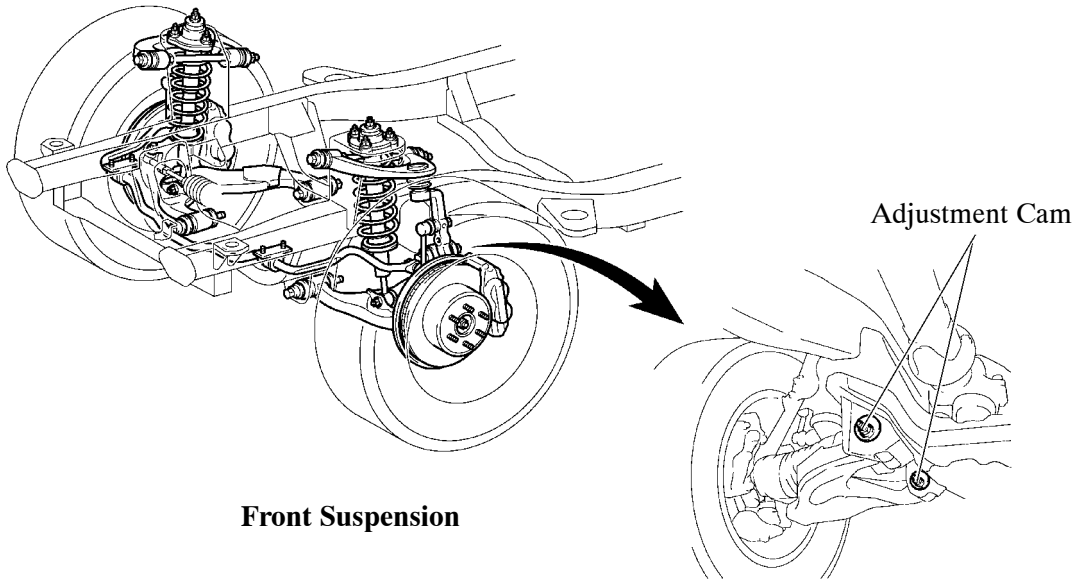

4WD Model

271CH44

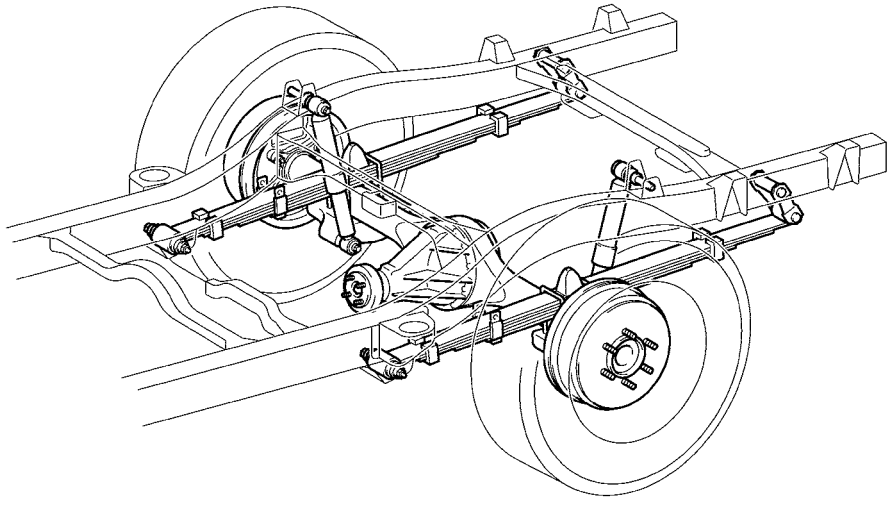

2. Front and Rear Suspension

Through the optimal allocation of components, the front and rear suspension provides excellent riding comfort, controllability, and off-road drivability.

Front Suspension

271CH45

271CH46

Rear Suspension

Service Tip

The camber and caster of the front suspension are adjusted at the adjustment cams of the lower arms, and the toe-in is adjusted by changing the lengths of the tie-rod ends.
For details, refer to the Hilux Repair Manual.
