■FUEL SYSTEM

1. General

- A fuel delivery pipe made of plastic is used.
- A compact 12-hole type fuel injector is used to improve fuel atomization.
- A compact and lightweight module fuel pump with fuel sender gauge is used.
- A quick connector is used to connect the fuel pipe with the fuel hose for excellent serviceability.

2. Fuel Delivery Pipe

- The fuel delivery pipe is made of plastic to reduce weight.
- The right and left fuel delivery pipes are connected by a nylon tube.
- The pulsation damper is sealed with an O-ring and secured with a holder.
