RUST-RESISTANT BODY

Rust-resistant performance is increased by using anti-corrosion sheet steel and performing anti-corrosion treatment by applying wax, sealer, anti-chipping paint, etc. to easily corroded parts such as the hood, doors, rocker panels, etc.

■ ANTI-CORROSION SHEET STEEL

Anti-corrosion sheet steel is used for many inner and outer panels of the body shell such as the fender panel, hood, doors and panels of the truck bed.
In addition, anti-corrosion sheet steel is used in the roof panel of the models for G.C.C. Countries and in the back panel of the double-cab model.
