■ WAX AND SEALER

Wax and sealer are applied to the hemmed portions of the hood, door panels and tail and tail gate to improve rust-resistant performance.

■ UNDER COAT

PVC (Polyviny Chloride) coating is applied to the under side of the body. A thick coating is applied to the fender apron and other parts which are subject to damage by flying stones, etc. to improve rust-resistant performance.

■ ANTI-CHIPPING APPLICATION

Anti-chipping paint and PVC chipping primer (models without side step only) are applied to the lower door panel area and the rocker panel area to protect them from flying stones. In addition, soft-chip primer is applied to the hood and front end panels.
