■CAB MOUNTING

The rubber cushion of the cab mounting have been optimized in order to improve the vehicle's riding comfort and to reduce noise and vibration. In particular, on the double-cab model, the No. 3 cab mounting that was provided on the previous model has been discontinued to reduce the droning noise. At the same time, on the double-cab model, a share-type cushion has been provided in the No. 2 and No. 4 mountings to improve the vehicle's riding comfort and to reduce both noise and vibration.
