## ■FUEL SYSTEM (For 1RZ-E Engine)

### 1. Delivery Pipe

- The delivery pipe is made of aluminum alloy for weight reduction.
- The pressure regulator and the pulsation damper have been provided in the delivery pipe.

### 2. Fuel Injector

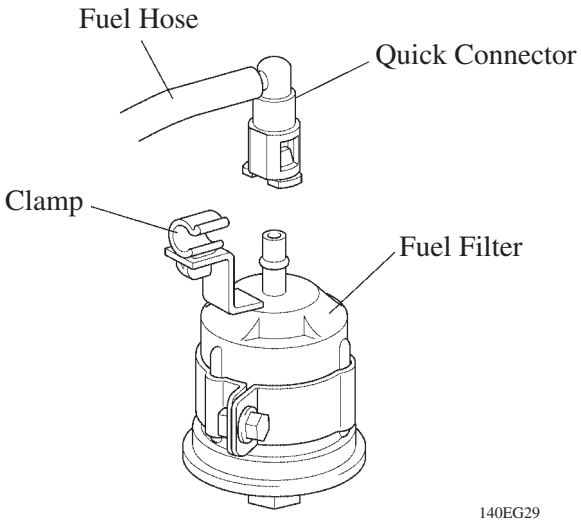

Side-feed type fuel injectors having a fuel inlet on the side are adopted. This type of fuel injector enables enables to cool the hot injector by the supplied fuel flowing through it. At the same time, this system can quickly release the vapor generated inside the injector for improved hot starting and drivability.
