2RZ-FE, 3RZ-F AND 3RZ-FE ENGINES

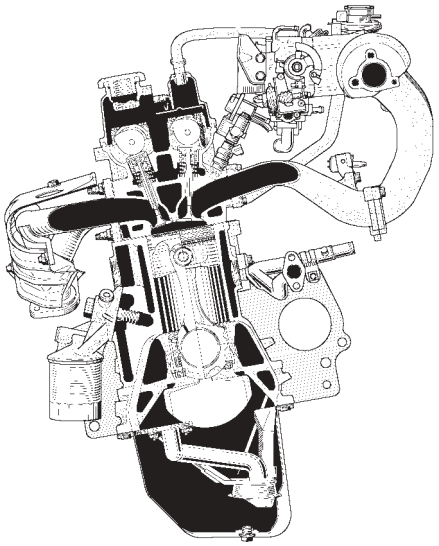

■ DESCRIPTION

The newly developed the 3RZ-F and 3RZ-FE engines are in-line 4-cylinder, 16-valve, 2.7-liter DOHC engines. The 2RZ-FE engine is based on the 3RZ-FE engine with its piston stroke shortened to provide a total cylinder displacement of 2.4-liter. These engines, which feature a 16-valve DOHC mechanism and improved intake and exhaust efficiency, realize high performance and good fuel economy.
The 3RZ-FE engine has adopted balance shafts to realize quieter operation.
