2L-T ENGINE

■ DESCRIPTION

The newly-developed 2L-T engine is an in-line 4 cylinder, 2.4-liter, OHC turbocharged diesel engine. This engine is a high-performance turbocharged version that is based on the 2L engine. In addition to the same basic construction and operation found in the 2L-T engine on the 4Runner (LN130 model), this 2L-T engine provides an injection pump with optimized fuel injection characteristics that offer higher output while reducing exhaust emissions.
