

35. Voice on Phone Cannot be Heard, too Quiet, or Distorted

INSPECTION PROCEDURE

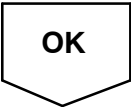

1	Check cellular phone.
---	-----------------------

Check if the voice on the other side can be heard using a cellular phone.

OK:

Voice can be heard.

NG	Replace cellular phone.
----	-------------------------

2	Check settings
---	----------------

(a) Check if the volume is set to the minimum or maximum setting.

HINT:

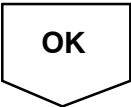

When the volume is set to the minimum or maximum setting, the sound may be distorted.

(b) Check if the MUTE switch is set to ON.

OK:

MUTE switch is not set to ON.

NG	Set mute switch correctly.
----	----------------------------

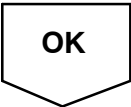

3	Voice check
---	-------------

Check if the navigation voice can be heard.

OK:

The voice can be heard.

NG	Go to "No voice navigation" (See page DI-1223).
----	---

Replace multi-display.
