

## 2003 MY for Brake Switch "B" Circuit High Monitor (P0724 / P1520)

To return to monitor description, see page [Ct-97](#).

### MONITOR STRATEGY

|                             |                      |                   |
|-----------------------------|----------------------|-------------------|
| Required sensors/Components | Main                 | Stop light switch |
|                             | Sub                  | None              |
| Frequency of operation      | Continuous           |                   |
| Duration                    | Go and stop 10 times |                   |
| MIL operation               | 2 driving cycles     |                   |
| Sequence of operation       | None                 |                   |

### TYPICAL ENABLING CONDITIONS

| Item                                                              |                                             | Specification                  |                          |
|-------------------------------------------------------------------|---------------------------------------------|--------------------------------|--------------------------|
|                                                                   |                                             | Minimum                        | Maximum                  |
| The monitor will run whenever the following DTCs are not present. |                                             | See page <a href="#">In-39</a> |                          |
| Engine family                                                     | Item                                        | Specification                  |                          |
|                                                                   |                                             | Minimum                        | Maximum                  |
| All models                                                        | Number of "go and stop" defined as follows: | 10 times                       |                          |
|                                                                   | Go                                          | More than 30 km/h (19 mph)     | –                        |
|                                                                   | Stop                                        | –                              | Less than 3 km/h (2 mph) |

### TYPICAL MALFUNCTION THRESHOLDS

| Engine family | Detection criteria | Threshold |
|---------------|--------------------|-----------|
| All models    | Switch status      | ON stuck  |
