INSTRUCTION

(For use with this catalog)

1. This PARTS CATALOG covers all the spare parts of the following models:

Toyota Land Cruiser Model BJ25, (RHD)

Toyota Land Cruiser Model BJ25L, (LHD)

2. In this catalog, parts are arranged and illustrated basically by groups of construction.
3. All the component parts forming parts assemblies or complete parts are clearly shown in the corresponding illustrations with marks such as A, B, AA, AO, etc., so as to be easily selected from the list.
4. Model names BJ25 and BJ25L are written either individually or together in the column of "Model" of each page.

In case of either BJ25 or BJ25L, the corresponding parts are exclusive to the model so indicated, while in case of both models, common to both models.

However, particular to Standard (Universal) Parts, model name is written only when they are exclusively applicable to any one of two models.

5. Part number and figure number index is provided on the back pages of this catalog. Furthermore, universal parts used on these models are specifically grouped at the extreme back of this index.
6. Covering Standard Tools and Service Special Tools (S. S. T.), a list is inserted in back page of this catalog.
7. Metric system is followed in the manufacture of all Toyota parts.
8. Part numbers are subject to change. Notice for such changes will be made.
9. Model "F" engine of 105 H.P. can be mounted on the same chassis of Model BJ25 at buyers option. With the "F" engine mounted, the corresponding Model name is changed into FJ25 with no other change than the engine itself. Detailed list of the "F" engine parts is attached to this catalog.

HOW TO USE THE INDEX

FOR TOYOTA UNIVERSAL PARTS

1. Toyota Universal Parts used for Models BJ 25 and BJ 25L are specifically grouped in this index so that they can be traced easily in this catalog.
2. Different from the part numbers of ordinary parts, the part numbers of Toyota Universal Parts represent the outlines of their individual shapes measurements and special treatments incorporated therein.

Please refer to the following explanation of the parts concerned:

B o l t

[J]	[B]	[N]	0 6	1 5	[Z]
Shape of Head	Initial of Bolt	Material	Diameter of Screw Part	Length Excluding Head	Plating or other Treatment

It is self-explanatory that this part JBN 0615Z is a standard JES (Japan Engineering Standard) bolt with screw diameter of 6mm and length of 15mm excluding head. Also, it is made of soft steel (N), zinc plated (Z).

S c r e w

[S]	[F]	0 4	1 2	[Z]
Shape of Head	Initial of Screw	Diameter of Screw Part	Length	Plating or other Treatment

This part SF 0412Z is a screw of a flat head with the screw diameter of 4mm and length of 12mm excluding head, zinc plated.

N u t

[C]	[N]	[N]	1 6	1 2	[T]
Shape of Head	Initial of Nut	Material	Diameter of Screw Part	Height	Plating or other Treatment

This part CNN 1612T is a nut made of soft steel with screw diameter of 16mm and height of 12mm, also, with special hexagon head.

Washer

<u>P</u>	<u>W</u>	<u>L</u>	<u>2</u> <u>5</u>	<u>0</u> <u>8</u>	<u>Z</u>
Kind of Washer	Initial of Washer	Shape of Section	Japanese Way of reading Diameter	American Way of reading Diameter	Anticor- rosive Treatment

This part PWL 2508Z is a $\frac{5}{16}$ inch steel washer for 8mm screw, zinc plated.

Cotter pin

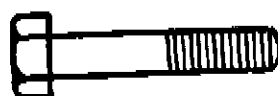

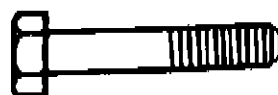

<u>W</u>	<u>P</u>	<u>1</u> <u>6</u>	<u>2</u> <u>0</u>
Shape of Cotter pin	Initial of Cotter pin	Diameter 1.6mm x 10	Length Excluding Head

This part WP 1620 is a cotter pin with diameter of 1.6mm and length of 20mm.
