■WIRELESS DOOR LOCK CONTROL SYSTEM

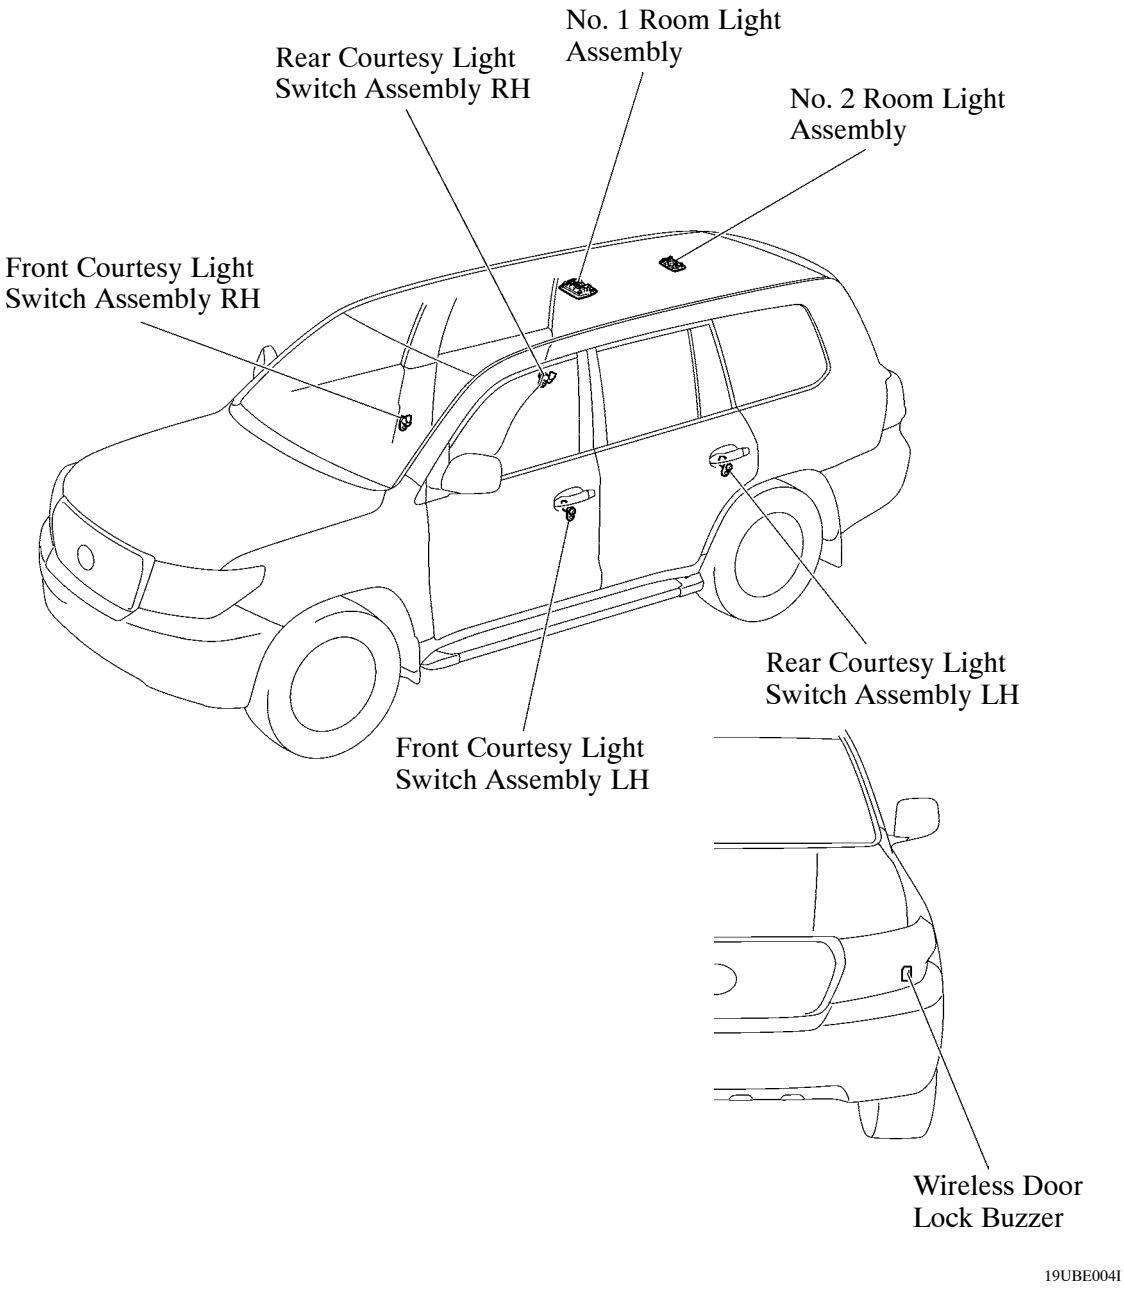

1. General

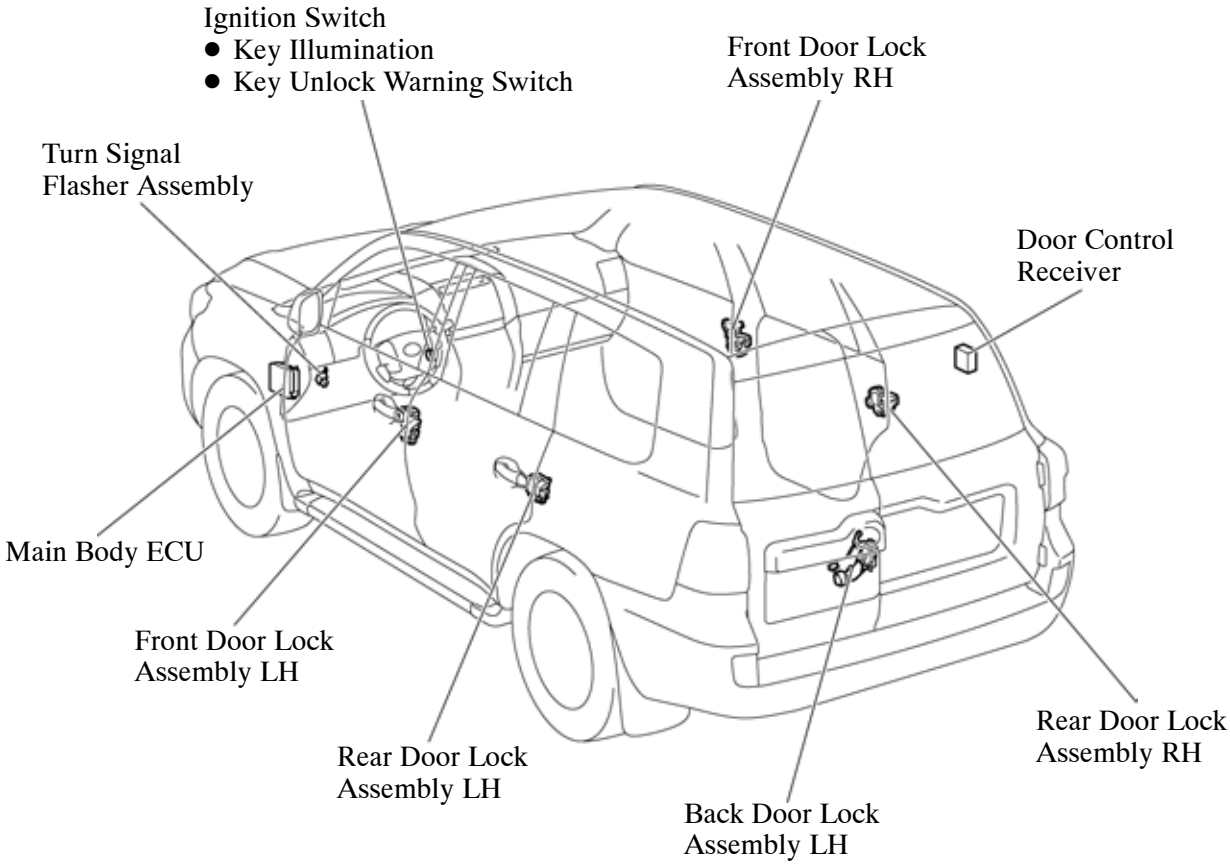

- The wireless door lock control system is a convenient system for locking and unlocking all the doors from a distance.
- In this system, the door control receiver performs the code identification process and the main body ECU performs door lock control.
- A key-integrated type door control transmitter is used, and it contains the following 2 buttons: lock button and unlock button.
- When preparing a new transmitter to replace one that has been lost, it is necessary to register the recognition code. For details, refer to the Land Cruiser Station Wagon Service Bulletin.

3. Function

The wireless door lock control system has the following functions:

Function	Outline
All Doors Lock	Pressing the lock button of the transmitter locks all doors.
All Doors Unlock	Pressing the unlock button of the transmitter unlocks all doors.
All Doors Unlock (2-step Unlock)	Pressing the unlock button on the transmitter once unlocks the driver door, and pressing it again within 3 seconds unlocks all the doors.
Automatic Lock Function	If none of the doors are opened for 30 seconds after being unlocked by the wireless door lock control, all the doors are locked again automatically.
Answer Back	The hazard light flashes once when locking, and the hazard light flashes twice when unlocking, to inform that the operation has been completed.
	The wireless door lock buzzer sounds once when locking, and the wireless door lock buzzer sounds twice when unlocking, to inform that the operation has been completed.
Door Ajar Warning	If any door is open or ajar, pressing the lock button of the transmitter will cause the wireless door lock buzzer to sound for approx. 5 seconds.
Customization	Some functions can be customized. For details, refer to the corresponding Repair Manual for this model.
