NEW FEATURES

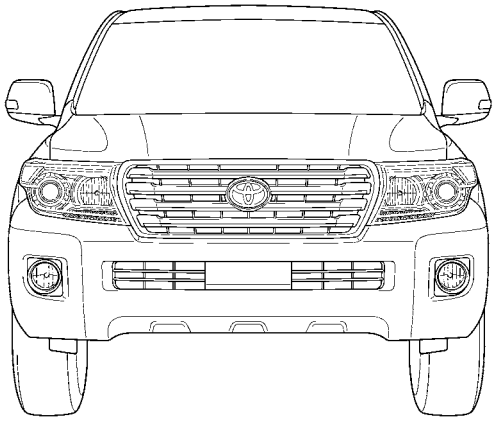

EXTERIOR

■ DESIGN CONCEPT

A credible atmosphere appropriate to the “King of 4WD” is expressed, thus giving a design with the appeal of a strong, tough image.

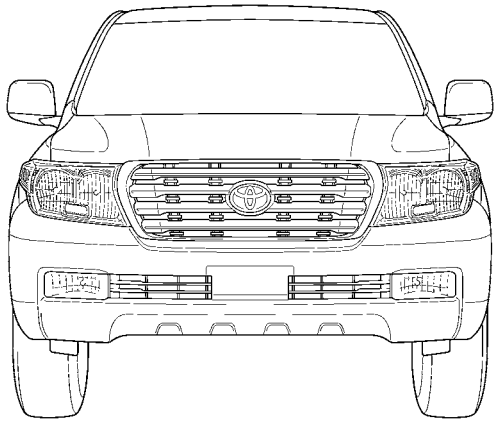

■ FRONT DESIGN

The headlight and radiator grille are constructed together, functionality is dispersed throughout the upper portion and a strength reminiscent of a Land Cruiser has been expressed by increasing the height of the front bumper.

New Model

19UMO100O

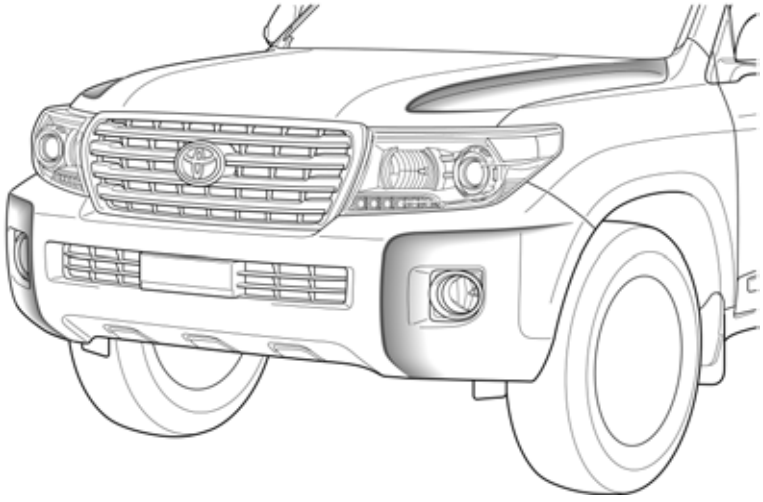

Previous Model

19UMO101O

- The sides of the hood and both edges of the front bumper have a planed metallic image, thus expressing strength.

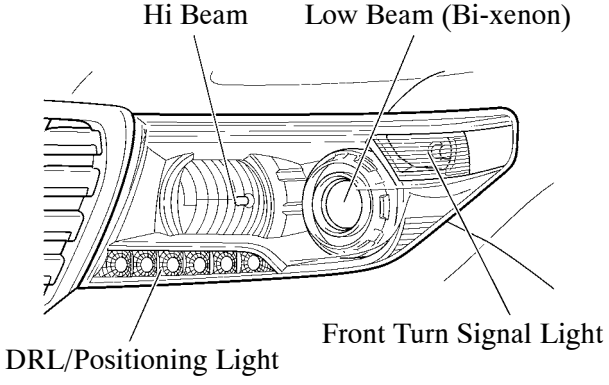

▶ Hood & Front Bumper ◀

19UMO102O

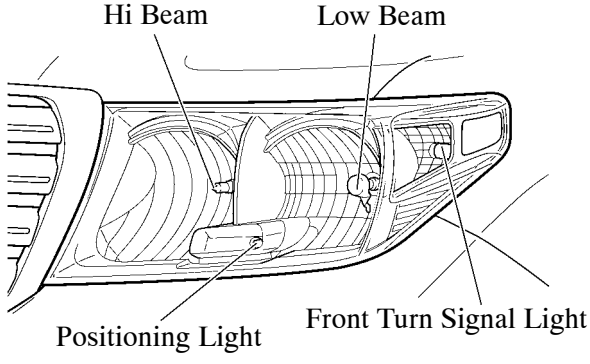

- The headlights have a traditional construction, with round lamps surrounded by a strong frame and protruding side turn lights. Moreover, the construction has evolved into a functional construction with aligned LEDs, thus giving a design which combines tradition with newness.

▶ Head Light ◀

New Model

19UMO103O

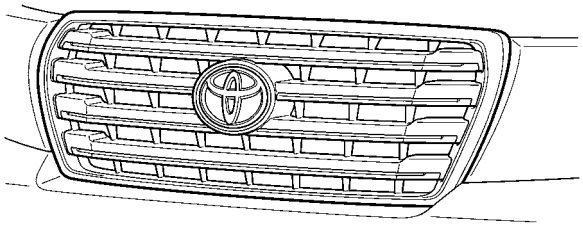

Previous Model

19UMO104O

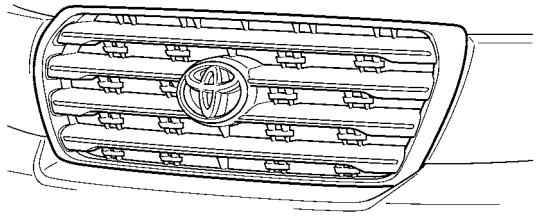

- The radiator grille has a feeling of solidity and thickness which extends to the headlights, giving a design reminiscent of a Land Cruiser.
- The radiator grille expresses strength and a feeling of precision by combining plating with a horizontal bar that has an angular cross-section, and through a construction which features a horizontal bar and an outer frame with a sense of depth.
