■ EXHAUST SYSTEM

1. Exhaust Manifold

On the models compliant with EURO 5 emission regulations, along with the use of the exhaust fuel addition injector assembly, an exhaust manifold pipe is provided to each exhaust manifold. This prevents fuel injected into the exhaust port from entering the EGR system.

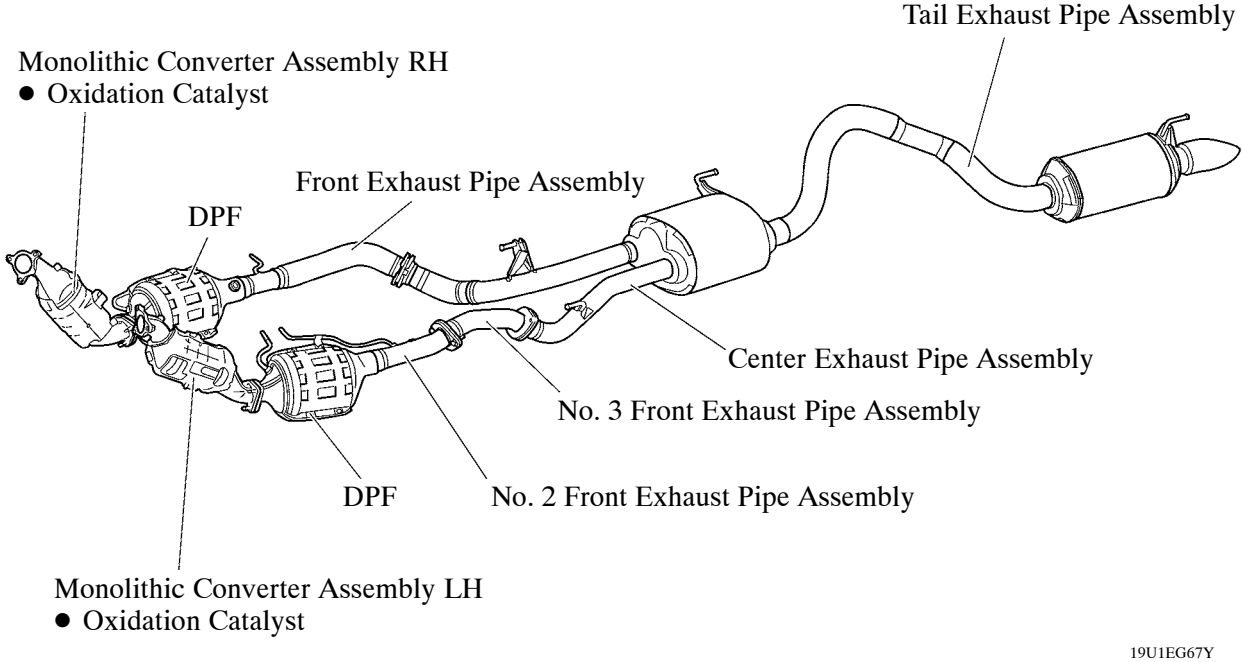

→ : Exhaust gas
⇢ : Exhaust gas and fuel from exhaust fuel addition injector assembly

Models Compliant with EURO 5 Emission Regulations

2. Exhaust Pipe

On the models compliant with EURO 5 emission regulations, an oxidation catalyst and Diesel Particulate Filter (DPF) are provided in each front exhaust pipe to capture Particulate Matter (PM).
