MULTI-TERRAIN MONITOR SYSTEM

■ DESCRIPTION

- In the multi-terrain select, the multi-terrain monitor system uses the television camera assemblies located on the front grille, outer rear view mirror assembly and back door to display images on the multi display to allow the driver to see blind spots around the vehicle, thus assisting the driver's vision.
- A switch to turn the multi-terrain monitor system on or off and to switch the screen display is located on the meter cluster.
- The system consists of the television camera assemblies, multi display, monitor switch and parking assist ECU.
