G-BOOK SYSTEM

■ DESCRIPTION

- The G-BOOK is a telematics service that links the vehicle and G-BOOK network (provides information from the G-BOOK center or content providers).
- To use the G-BOOK system, it is necessary to connect the multi-media module receiver assembly with a Bluetooth-compatible cellular phone via Bluetooth.
- The user needs to follow the instructions displayed on the multi display to start using the G-BOOK system service after applying for the service at a dealership.

*: By connecting a cellular phone to the multi-media module receiver assembly via Bluetooth, the G-BOOK service can use the internet as a communication network for sending and receiving data and voice signals.
