Remote Maintenance Service

- The multi-media module receiver assembly sends a remote maintenance mail to the registered dealer via the cellular phone to provide information about the condition of the vehicle.
- The dealer center then notifies the vehicle user about the inspection timing and maintenance notice.

Operator Service

- The operator service provides the user with a direct call to a G-BOOK center operator. The user can ask the operator to set a destination or send a POI facility search result or news and weather forecast information to the navigation system.
- The operator service uses the multi-media module receiver assembly to make calls via the cellular phone (it is necessary to have the phone registered using the Bluetooth hands-free function).

Function	Outline
Destination Setting	Displays the specified destination location on the navigation system screen.
Nearby POI Facility Guidance	Displays the detailed information and location of the specified facilities on the navigation system screen.
Weather Forecast*	Displays and reads out the vehicle location, destination or weather forecast for the specified area.
News*	Displays and reads out updates, society, sports and entertainment news.

*: By using the browser content display function built into the navigation system, the contents can be displayed. If news content is displayed, headlines are read out to assist the driver in checking the content easily even while driving.

Navigation System Link Function

- The navigation system link function provides the navigation system with real-time information obtained from the G-BOOK center, thus offering more effective use of the navigation system for the user.
- The navigation system link function has the following functions:

Function	Outline
G Route Search	Searches for the most suitable route to the destination based on a wide-area traffic congestion prediction.
Facility Information Display	Displays information about facilities which are not included in the navigation system.

■ DIAGNOSIS

For details on the procedure required to enter the service menu screen, refer to the Repair Manual.
